

BAADER Presents Next-Generation Seafood Processing Solutions at SPG 2026 | Booth 3JJ601 | Barcelona, Spain | April 21–23, 2026

- **Seafood Processing Global 2026:** BAADER will present flexible, scalable and reliable solutions for salmon, whitefish and multi-species processing under the topic “Solutions on Demand.”
- **Customer value in focus:** BAADER will show how seafood processors can improve yield, automation, food safety, animal welfare and raw material utilization in response to cost pressure, labour shortages and sustainability demands.
- **Technology highlights:** The showcase includes the BAADER 102, BAADER 144 Pro, BAADER 581 Pro, as well as modular platforms with advanced vision systems and AI-based features.
- **Expert Talk at the BAADER booth:** Following the [presentation](#) of Nils Rabe, Global Sales Director of BAADER and CEO of BAADER North America, BAADER invites to continue the discussion at booth 3JJ601.

Lübeck, Germany / Barcelona, Spain, April 2026 – BAADER will showcase its latest seafood processing solutions at Seafood Processing Global 2026, taking place 21–23 April 2026 in Barcelona, Spain. Visitors can meet the BAADER team at booth 3JJ601 to explore how the company supports seafood processors in improving yield, automation, food safety, animal welfare and raw material utilization.

Under the theme “Solutions on Demand”, BAADER’s presence at this year’s event will address the key challenges and opportunities shaping the seafood industry. As processors face rising cost pressure, labour shortages, stricter food safety and animal welfare requirements, and growing expectations for more sustainable operations, BAADER continues to develop solutions that combine flexibility, reliability and long-term business value.

“At Seafood Processing Global 2026, we want to demonstrate how seafood processors can increase productivity, improve quality and create more value from every fish,” says Nils Rabe, Global Sales Director of BAADER and CEO of BAADER North America. “Our solutions are designed to help customers respond to changing market demands, labour constraints and rising expectations in food safety and sustainability.” ([Read the full press release](#))
