

FOR IMMEDIATE RELEASE

AQUALANDE GROUP, EUROPEAN LEADER IN AQUACULTURE, AT THE WORLD'S LARGEST AND MOST DIVERSE SEAFOOD TRADE EVENT

[France, 24 March] – Aqualande Group will be at the world's largest and most diverse seafood trade industry event [Seafood Expo Global/Seafood Processing Global](#) to showcase an integrated, innovative and high-performance aquaculture value chain through its three entities Aqualande Origins, Fermes Marines du Soleil (FMDS) and Piszolla. Together, they embody a fully integrated aquaculture model, based on end-to-end control of the value chain – from genetics to fish processing – and illustrate the Group's ability to innovate, grow and sustainably support the evolution of the international aquaculture market. Organized by Diversified, the Expo will take place from 21 – 23 April 2026 at the FIRA Barcelona Gran Via Venue.

AN INTEGRATED MODEL SERVING PERFORMANCE AND SUSTAINABILITY

Founded in 1981, Aqualande Group has established itself as a **leading European reference in aquaculture** by combining economic performance, technological innovation and respect for ecosystems. As Europe's leading producer of trout and smoked trout, **the Group controls the entire value chain through three core pillars: selection and breeding, farming, and processing.** The joint participation of three of its entities at Seafood Expo Global highlights this approach, designed to serve aquaculture professionals worldwide.

“Our presence at Seafood Expo Global in Barcelona reflects the maturity of our integrated model and our ambition to sustainably support the development of global aquaculture. From genetics to market ready products, we provide concrete, field proven solutions focused on performance, sustainability and value creation,” explains **Emmanuel Mazeiraud, Deputy Chief Executive Officer of Aqualande Group.**

AQUALANDE ORIGINS, THE FOUNDATION OF AQUACULTURE PERFORMANCE

Aqualande Origins is a global reference in selective breeding and eyed egg production and is currently **the only trout egg supplier integrated into a fully controlled value chain.** This model guarantees genetic performance that is directly validated within the Group's own farming and processing sites.

For over 40 years, **Aqualande Origins has been developing selected strains designed to meet today's industry expectations:** fillet quality, robustness and disease resistance, all within a sustainable framework. Built on continuous investment in R&D, this expertise enables the company to support producers worldwide in addressing the technical, economic and environmental challenges facing the sector.

At Seafood Expo Global, Aqualande Origins reaffirms its position as **a premium partner for fish farmers in France and internationally**, while continuing its expansion into fast growing markets, particularly in Europe, the Middle East and South America.

FMDS, A FORWARD-LOOKING LEADER IN MARINE HATCHERIES

A subsidiary of Aqualande Group, **Fermes Marines du Soleil (FMDS) is a pioneer and leading reference in marine hatcheries**. With three hatcheries, three pre growing sites and annual production exceeding 100 million fry and larvae of seabream, seabass, meagre and shrimp, FMDS provides long term support to the global marine aquaculture sector, backed by logistics capabilities enabling international shipments.

FMDS's participation in Seafood Expo Global serves a dual purpose: **strengthening close relationships with long standing customers and supporting geographic diversification into new growth areas**, particularly around the Mediterranean basin and the Arabian Sea. It also reflects the company's commitment to enhancing customer service, with the upcoming launch of a new on site after sales support mission.

PISZOLLA, CREATING VALUE THROUGH PRODUCT INNOVATION AND ORIGIN

Aqualande Group's Spanish subsidiary is currently developing **a local Spanish brand of smoked trout**. Piszolla follows a locavore approach, offering Spanish consumers trout from a responsible, fully controlled value chain, farmed in Spanish rivers – a first on the Spanish market.

Piszolla's presence at Seafood Expo Global aims to **support the rollout of this new "made in Spain" offering**, positioning smoked trout as a high quality, sustainable alternative to imported salmon. The trade show will also provide an opportunity to present the available product formats (60 g and 100 g), packaging and brand universe, while encouraging direct exchanges with prescribers and professional buyers.

About Aqualande Group

Founded in 1981, Aqualande Group has become the European leader in aquaculture over the years. Innovative and high performing, the Group successfully combines economic growth, technological development and environmental responsibility. Drawing on the expertise of its teams, Aqualande Group has continuously adapted to increasing market demands while developing ever more efficient fish farming practices in harmony with the natural environment. The Group operates across the entire aquaculture value chain, from trout farming to processing, through three business divisions: selection and breeding, trout farming, and trout processing.
