

FOR IMMEDIATE RELEASE

## **EUROBELT to Showcase Modular Belting Solutions for the Seafood Industry at Seafood Expo Global/Seafood Processing Global**

***Visitors to the EUROBELT stand can expect to discover solutions specifically suited to the fish and seafood industry, where drainage, hygiene and careful product handling are especially important. Featured solutions will include the E30 series with Raised Rib flights for controlled product advancement, the C12 series for lines requiring good drainage, easy cleaning and reduced transfers, and the Q50 Series, one of EUROBELT's key hygienic belting ranges.***

[Valladolid, Spain, 20 March] 2026 – [EUROBELT (hyperlinked)] announces [that it will showcase modular belting solutions for fish and seafood processing, with special emphasis on its hygienic Q50 Series] at the world's largest and most diverse seafood trade industry event, Seafood Expo Global/Seafood Processing Global. Organized by Diversified, the Expo will take place from 21 – 23 April 2026 at the FIRA Barcelona Gran Via Venue. [Visitors will find EUROBELT in Hall 3, stand 3NN501, where the company will present some of its most suitable solutions for the seafood industry. In addition to the E30, C12 and Q50 ranges, EUROBELT will also present a broader conveying proposal linked to its alliance with Movex Group, including the Movex BlueLine range and the Zero Contact Hygienic modular solution.]

“Seafood Expo Global is an excellent opportunity for EUROBELT to present solutions adapted to the real demands of fish and seafood processing lines. With products such as our E30 with Raised Rib flights and our C12 series, we want to show visitors how modular belts can support better handling, improved hygiene and stronger overall line performance.”

[What makes EUROBELT's presentation especially relevant for this industry is its focus on specific processing challenges rather than general-purpose conveying. In seafood applications, effective drainage, easy cleaning and careful handling of delicate products are essential. The E30 series with Raised Rib flights offers controlled and reliable transport, while the C12 series is especially well suited to lines where drainage, hygiene and reduced transfer points are critical. The Q50 Series adds a particularly strong hygienic proposition, as its public product materials highlight its rodless assembly concept, one-click mounting and hole-free structure for excellent cleaning. This message is complemented by EUROBELT's alliance with Movex Group, which broadens the overall offering with additional conveying solutions such as BlueLine and Zero Contact Hygienic, a modular solution developed for industrial environments with critical hygienic requirements and approved by FDA for direct food contact.]

###

### **About Eurobelt:**

EUROBELT is a manufacturer of modular belts and conveying solutions for industrial applications. Based in Valladolid, Spain, the company develops products focused on performance, reliability and adaptation

to demanding production environments, including hygienic applications for the food industry. As part of its alliance with Movex Group, EUROBELT continues to strengthen its ability to offer customers a broader conveying portfolio.
