

Making our world more productive

Promotional Release

Linde to Showcase Cryogenic Freezing Systems at Seafood Expo 2024

DANBURY, Conn., (January 29, 2024) – Linde (NYSE:LIN) will once again be demonstrating its expertise in the field of cryogenic freezing and chilling applications, bringing key equipment systems to Seafood Processing North America (SPNA) at Boston’s Convention and Exhibition Center - March 10-12, 2024 - in booth 1465.

Visitors to the Linde booth will be able to experience first-hand the CRYOLINE® PB plate belt tunnel freezer to quickly and smoothly freeze wet products that are typically difficult to handle, like marinated or sauced seafood. Also on display will be the CRYOLINE®UPF flighted freezer – a rapid and efficient method to produce individually quick-frozen shrimp, scallops, clams, and other seafood product portions.

Linde works with leading seafood processors to optimize their use of liquid nitrogen and/or liquid carbon dioxide in cryogenic freezing and chilling applications. The shared goal is to rapidly freeze or chill seafood products to their desired target temperatures in a highly cost-effective and energy-efficient manner.

“Proper freezing and chilling techniques help ensure final product quality meets stringent standards and meets consumer taste preferences,” said Chris Johnson, Linde business development director. “Cryogenic freezing is an extremely efficient way of preserving the quality of high-value seafood products. This can give seafood processors a significant point of difference for the frozen seafood products they bring to market while maintaining manufacturing efficiencies.”

In addition to demonstrating its proven cryogenic freezing and chilling processes, Linde will also be highlighting the groundbreaking Linde Green™ nitrogen – specially engineered to support the carbon reduction plans of seafood processors, while still meeting all the requirements of their cryogenic freezing and chilling needs.

About Linde

Linde is a leading global industrial gases and engineering company with 2022 sales of \$33 billion. We live our mission of making our world more productive every day by providing high-quality gases, technologies and services which are making our customers more successful and helping to sustain and protect our planet.

The company serves a variety of end markets including chemicals & refining, food & beverage, electronics, healthcare, manufacturing, and primary metals. Linde's industrial gases are used in countless applications, from life-saving oxygen for hospitals to high-purity & specialty gases for electronics manufacturing, hydrogen for clean fuels and much more. Linde also delivers state-of-the-art gas processing solutions to support customer expansion, efficiency improvements and emissions reductions.
