Metabolic Syndrome & the Microbiome

CORE THERAPEUTICS FOR
A COMMON CONDITION
FRIDAY FEB 16 | 7:30 AM

Let's not sugarcoat it: Metabolic syndrome and insulin resistance affect over 30% of the adult population in the US. Understanding the significant role the gut microbiome plays in regulating blood sugar and metabolism is key to helping patients successfully deal with this common condition. Join Dr. Jocelyn Strand, ND, Director of Clinical Education and Research at Biocidin Botanicals®, and Dr. Jill Carnahan as they share the latest science related to the microbiome and blood-sugar regulation.
