

JD5 HYGIENE GmbH

3 Pillars we work

1. Foam cleaning device
2. Cooling mat
3. Freelancer for food producer AR, KI included

Main topic is the startup first time show. Patented Cool Thorn as alternative cooling mat to display seafood or fish without using ice. Sustainable by using sea water, only freeze, display, clean, freeze, for 1000+ uses. Showcasing

Second pillar is the freelance part, I work for Food companies to find ways to optimize the production, or create the best facility, support when hygiene is a topic. with more than 30 years' experience. For this I use modern techniques like KI, Clamb on sensors, AR, CIP- diagnose with KI and more.

Finally, the foam cleaning unit Thorni, this unit is elaborated on the day-by-day use, no knop or switch for different actions. All in one with tab water connection and a nozzle one for all
